Free Online Pedigree Chart Maker In 2024

October 16, 2024 by Andy Smith

Before knowing the details about 5 **online pedigree chart maker in 2024**, it is essential to know what is an **online pedigree tree maker**. So, a Pedigree maker is a chart or diagram that helps to represent the relationship of your respective family. Along with that, you can also add the pictures as well as other records in the respective **pedigree chart**.

Pedigree Chart Maker In 2024:-

Family Tree Builder

Family tree builder is considered to be one of the best pedigree makers, which help in researching family history. Along with that, it helps in **creating a free family tree**, and you can easily download it absolutely for free. With the help of this software, you can easily get many powerful tree software as well as intelligent technologies for matching. It also provides many outstanding features, including various beautiful charts.

Genial Pedigree Draw

Genial Pedigree Draw is very famous among users, and today, it is used by many people. Its web version is free, but no other versions. With the help of this, you can easily **make a pedigree chart** by simply adding various components. Also, it helps in constructing as well as exporting the **pedigree chart** with just a simple tap. You can also add various kinds of pedigree shapes and help them connect in the way that you want. Not only that, but you can easily create a chart as big as you want.

To use it, you can register for free on the website, and then quickly, you can start designing your respective chart. Not only that, you can easily name the chart, and then you can immediately create the family or new entry by giving a right tap there. Next, you have to combine the shapes and then go to a node if you want to expand it, and then finally, go to continue and then give a click on the save option. Also, if you need to export, then you need to quickly click on the print symbol mentioned in the top right corner.

Free Online Tool:-

Free Online Pedigree Tool is a basic yet very effective tool for quickly making a pedigree chart. It helps construct the free pedigree chart and then exports it as an image from this respective page. It also asks for various parameters before constructing the **pedigree chart**.

For basic details such as chart name, player details, and other proband as input parameters, you can write down information like the number of brothers or sisters or several sons or daughters, depending on the users. Finally, it will display the complete pedigree chart.

If you want to use it, click on the link and go to the pedigree builder tool. There, you can generate the chart, write down the complete information, and easily make a final **pedigree chart**.

Pedigree Chart Creator

Pedigree Chart Creator is a simple web tool for generating pedigree charts using the information you provide. It needs a list of some pedigree participants along with their genders and other factors such as date of birth, comments, name, and more.

You can easily choose up to 5 members, but you can easily increase the number of members if you want.

To use it, you don't need to create an account; you just have to go to the respective URL and enter the parameters as asked, and then you will be able to use it without any issues. But it only allows you to fill out the form for 5 people. If you have more members, then to raise the number, add the 5-row button and then go ahead to create a pedigree button quickly for generating the final chart.

Canva: Free Pedigree Maker

Canva is considered to be a **free online pedigree maker**, but with the help of this, you can easily **create a chart**, and it requires no time. You can easily create a pedigree chart with the help of an online graphics tool. Also, you need to use the shapes tool for **making the pedigree chart**, and then you need to quickly create a **pedigree chart** depending on your wish.

To use Canva, you need to register a free account, go to the start option, and then start adding charts from the different charts mentioned there. This is how you can easily create your own chart and save it on your respective device.
